32 FAIR VALUE MEASUREMENTS

The fair value of quoted securities other than those classified under amortised cost, is based on quoted market price. Quoted securities classified under held to collect model are carried at amortised cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements.

The fair value of certain un-quoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowing can not be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Fair value measurements using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the year by the level in the fair value hierarchy into which the fair value measurement is

Fair Value of non-financial assets					
- Non-current asset 'Held For Sale'	59,182	-	-	59,182	59,182

The fair value of financial assets and liabilities not carried at fair value are not significantly different from their carrying values since assets and liabilities are either short term in nature or in case of loans are frequently repriced.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and fair value estimates.

Valuation techniques used in determination of fair values

Listed securities	The valuation has been determined through closing rates of Pakistan Stock Exchange.
Pakistan investment bonds	The fair value of Pakistan investment bonds are derived using PKFRV rates. The PKFRV rates are announced by FMA (Financial Market Association) through Reuters. The rates announced are simple average of quotes received from eight different predefined/ approved dealers / brokers.
Market Treasury Bills	The fair value of Market treasury bills are derived using PKRV rates. The PKRV rates are announced by FMA (Financial Market Association) through Reuters.
Listed sukuk / term finance certificates	The valuation has been determined through the valuation of debt securities published by the MUFAP.
Unlisted sukuk / term finance certificates	Since these are unquoted sukuks therefore for the valuation perpetuity formula was used for the purpose of valuation
Non-current asset 'held for sale'	Non Current Assets held for sale are valued by professionally qualified valuers as per the accounting policy disclosed in these unconsolidated financial statements.

The valuation of non-current assets held for sale, mentioned above, is conducted by the valuation expert appointed by the Company. The valuation expert use a market based approach to arrive at the fair value of the non-current asset. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable or similar properties. This value is adjusted to reflect the current condition of the asset. The effect of changes in the unobservable inputs used in the valuation cannot be determined with certainty, accordingly a quantitative disclosure of sensitivity has not been presented in these unconsolidated uncondensed financial statements.

The Company's policy is to recognise transfers into and out of the different fair value hierarchy levels at the date the event or change in circumstances that caused the transfer occurred.

There were no transfers between levels 1 and 2 during the year.

36.7 Pool management

The Pools, their key features & risk and rewards characteristics:

Currently holding Company's Islamic Finance Division (IFD) operates the following two pools:

36.7.1 Equity Pool:

Equity pool is being managed for those assets which are currently not generating income and are in either at advance or inventory stages. Once the nature of advance changes to financing stage, those assets would be transferred to another income generating pool for the benefit of depositor / FI.

The risk of generating income at later stage due to nature of Islamic Financing assets and risk of staff related financing are borne by equity holders.

36.7.2 Musharaka Pool:

Musharaka pool is being managed through the principles of Sharika (Musharaka). In Musharaka, two or more partners contribute their capital (mainly in cash) into the pool where different income generating assets are tagged. Income generated through those assets are distributed between the partners as per agreed upon Profit-sharing ratio.

Risk of loss is shared between partners as per the ratio of investment.

The assets, liabilities, equities, income and expenses are segregated for each pool.

36.7.3 Avenues / Sectors where Mudaraba / Musharaka based FI Funds / deposits have been deployed:

Total Gross Islamic Financing and Related Assets	<u>11,811,298</u>
Total Gross Investments (at cost)	<u>4,666,493</u>
Total Invested Funds	<u>16,477,791</u>

36.7.4 Parameters used for allocation of profit, charging expenses and credit loss allowance etc. along with a brief description of their major allowance:

Holding Company's IFD is currently accepting funds through Financial Institutions under Musharaka arrangements, wherein PKIC-IFD and other Financial Institutions are considered as partners. Funds received from FI is transferred in the pool where PKIC-IFD also contributes its capital. Before accepting funds, PKIC-IFD and FI set profit sharing ratio in line with the expected profit to be earned against FI funds.

The funds so generated are invested by PKIC-IFD in Shariah compliant modes of financing and investments such as Murabaha, Istisna, Diminishing Musharakah, Tijarah, Running Musharakah, and Sukuks etc.

PKIC-IFD calculates the profit of the pool at the end of every month. Profit is distributed at the net income level. Net income is calculated after deducting direct costs (if any).

The net income / (loss) is being allocated between the PKIC-IFD's fund and FI's fund in proportion to their profit-sharing ratio.

The PKIC-IFD's profit sharing ratio during the period was 5% of net income and the FI's profit sharing ratio was 95% of net income.

After the allocation of income between the equity holder and FI, the profit is distributed among the different FIs on the basis of pre-determined

ECL provisioning shall not be considered in the income calculation of pool. However, write-offs of financings and loss on sale of investments shall be charged to the pool along with other direct expenses.

36.7.5 Mudarib/ Musharik Share (in amount and percentage of distributable income)

Currently, PKIC-IFD does not have Mudarabah based pool. Therefore, Mudarib share is not applicable.

However, Musharaka share of PKIC-IFD is Rupees 7.86 million having percentage of 4.99%.

36.7.6 Amount and percentage of Mudarib / Musharik share transferred to the depositors through Hiba

PKIC-IFD has given general Hiba of Rupees 18,484 (0.01%) to FI.

36.7.7 Profit rate earned Vs. Profit rate distributed to the depositors during the period

Profit Rate Earned	22.95%
Profit Rate Distributed	20.80%
