### Liquidity Coverage Ratio (LCR)

During the Year, State Bank of Pakistan implemented two liquidity standards under its Basel III reforms i.e. Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR). LCR aims to augment the short-term resilience of the liquidity risk profile of banks/DFIs by ensuring that they have sufficient stock of unencumbered high-quality liquid assets (HQLA) to endure a significant stress scenario for 30 calendar days. While, NSFR aims to decrease the funding risk over a longer time horizon by requiring banks to fund their activities with adequately stable funding sources on continuing basis.

To manage its liquidity risk considering its level of liquidity, PKIC uses various tools / risk management procedures including Cash Flow Projections/Maturity Gap, Liquidity Ratios/Limits and Stress Testing apart from SBP defined limits of CRR/SLR and LCR/NSFR.

PKIC maintains a Contingency Funding Plan which outlines response to liquidity stress and uses stress tests across multiple scenarios across various time horizons to set forth a course of action. Notably, In order to maintain adequate liquidity, PKIC maintains sufficient stock of High Quality Liquid Assets which primarily consists of Unencumbered Government Securities.

### Net Stable Funding Ratio (NSFR)

Net Stable Funding Ratio "NSFR" ensures that PKIC reduces funding risk over a longer time horizon by requiring the company to fund its activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress.

The NSFR limits overreliance on short-term funding, encourages better assessment of funding risk across all on-and-off balance sheet items and promotes funding stability. The ratio is defined as the amount of available stable funding (ASF), relative to the amount of required stable funding (RSF). NSFR reporting to SBP commenced from March 31, 2017 on a quarterly basis. Minimum requirement is set at 100% by SBP, effective from December 31, 2017 onwards.
